

James LaBrie

James LaBrie brings powerful vocals to an extremely talented band. There are not many singers who can complement Dream Theater the way James does. To really appreciate what James brings to Dream Theater, one must be familiar with his solo works. If you are a Dream Theater fan, you will likely appreciate these albums, too.

From Wikipedia:

James LaBrie was born in Penetanguishene, Ontario, Canada and started singing and playing drums at age 5. By his mid-teens, LaBrie was a member of several bands as a singer and/or drummer, and in 1981, at age 18, he moved to Toronto to further his musical pursuits. He currently still resides in Toronto, with his wife Karen, daughter Chloe, and son Chance. After stints with various bands, he became the vocalist for glam rock band Winter Rose, who released a self-titled album in 1987. In 1991 he learned that a relatively unknown American progressive metal band called Dream Theater was in the market for a singer, so he sent down a tape and was quickly flown to New York for a full audition. The trial went well, and he was chosen ahead of 200 other hopefuls to fill the full-time vocalist position in that band.

Having two Johns (Myung and Petrucci) in the band already, and with another Kevin in the band, LaBrie dropped his first name and adopted the stage name James LaBrie. In 1993, he was the first choice consideration to replace departed Iron Maiden vocalist, Bruce Dickinson, as well as a consideration to replace Rob Halford in Judas Priest. (Dream Theater went on to record Deep Purple's "Perfect Strangers" at the BBC radio studios with Bruce Dickinson, as well as perform an Iron Maiden medley live with Bruce in Los Angeles.) James has since had a significant impact on the vocal melodies on each Dream Theater album, but continues to have little input into the musical side of Dream Theater. To date he has written lyrics for at least one song on each album (excluding Images and Words) Dream Theater has released with him in the band.
